

Storage: Available for your grains:
Soybeans, Corn, Oats and Barley.

Cleaning: We have a small grains cleaner to clean oats, wheat and rye to make planting as efficient as possible.

Dryer: Corn drying to help get the harvest off in the fall and get the commodity into storage or off to market.

SERVICES

Dairy nutritional consulting:

We have full-time Feed Consultants who can help you balance your rations to get the maximum return out of your cattle.

We are on the cutting edge using the latest technologies in digestibility for the dairy industry to maximize feed efficiency.

Grinding: We have a hammer mill grinder and a triple pair 12”X36” roller grinder to process your grains into feed suitable for your operation whether TMR or top dress feeding.

Rolling: Rolling is also an option for grain processing to fit into your feed ration for your cattle.

Custom mixing: Our facility has two 8-ton mixers one 4-ton mixer and one 1-ton horizontal mixer to blend everything from feed to mineral.

Roasting: Custom roasting available by appointment with a state of the art “THERMO-PRO HEAT PROCESSER”. Which can process from 5 to 12 ton per hour at competitive rates. All beans are steeped to allow full benefit of bypass protein.

Seed Treatment: We offer seed treatment for the crops of soybeans, wheat and special treatments of corn.
